

NEIL ROBERTSON STRETCHER

LIGHT AND COMPACT STRETCHER ↓

This stretcher is lightweight and compact compared to other stretchers, provides more freedom of movement and flexibility for the user. It is ideal for use in engine-rooms, cargo holds and boiler rooms where access or hatch sizes are limited. A well-proven rescue stretcher for use in an instance where a casualty needs to be lowered or lifted to safety, allowing simple and safe recovery of a patient from difficult or unconventional situations. Widely used by the navy, mines, factories and emergency services.
