L170

LIFEBUOY LIGHT

Daniamant lifebuoy lights are designed for automatic activation by the releasing of the lifebuoy to which the unit is attached. The light activates when pulled from the housing and can also be activated manually if needed.

The L170 is MED/SOLAS approved.

MED/SOLAS and USCG standards call for the Lifebuoy lights to be dropped from 30 metres. All these Lifebuoy lights have passed a drop height test from 76 metres high. This makes these lifebuoy lights suitable for use on any platform or vessel with high bridge wings. Lifebuoy Lights are supplied with a unique mounting bracket enabling easy fitting in all locations.
