WALK TO WORK SURVIKIT BAG

COMPLETE PROTECTION FOR YOUR ENTIRE JOURNEY - ONBOARD TO AT HEIGHT

The SurviKit Walk to Work bag (W2W) is a single solution for personnel travelling to and from offshore locations with the requirement for accessing and working at height. The SurviKit bag has been designed for the offshore wind sector but is also suitable for any offshore environment where working at height is required. Designed to meet the diverse working environments, the SurviKit bag is the industry's first complete kit bag available in three variations. Composed of a variety of personal protection and height equipment, the SurviKit bag uses recognised and trusted brands to ensure each user is working with the highest industry standard of protection. The SurviKit bag offers a single solution for travelling, accessing and working safely in offshore and renewable environments.
