

1000S REAR AIRCREW IMMERSION SUIT

Comfort and safety for helicopter rear crew

For demanding operations in tough environments. The ergonomic design and modular pockets allow easy movement and performance of tasks, unhindered and in comfort, whilst the reinforcement and padding in high wear areas also makes the suit highly durable.

BENEFITS:

- ✓ GORE-TEX Nomex outer shell combines breathability with fire protection
- ✓ Reinforced and padded areas ensure working comfort and longevity of suit
- ✓ Ergonomic design with articulated sleeves and trousers to ensure crew are not restricted in completing the demanding physical tasks required of their role
- ✓ Air release valves enable controlled escape and safety in the water
- ✓ Lightweight thermal liner provides thermal protection to the ETSO standard
- ✓ Rent or buy. Rental options available to ensure crew keep flying while their suits are serviced
