MK45 AIRCREW LIFE PRESERVER

Provides maximum flexibility and protection

Optimally designed for use on a rotary wing and transport aircraft. The MK45 is a sleeveless garment comprising a waistcoat, a detachable floatation assembly, and a pouch. The inflated stole adapts its shape to support the wearer at the correct angle of floatation.

BENEFITS:

- ✓ Flame retardant material - for additional protection in emergency situations
- ✓ Internal and external pockets – for storage of operation specific equipment, such as STASS, PBL and survival aids
- ✓ Lifting buckets fitted as standard – enabling easier rescue
- ✓ Supplied operational or non-operational – to enable use as a training garment

“ Protection for aircrew -
your most valuable asset ”
